#### Abstract

Coronectomy, as an alternative treatment option of lower impacted third molars, becomes even more accepted and popular. Its aim is to significantly reduce the incidence of irreversible inferior alveolar nerve injuries. The lecture clarifies the indications, give practical recommendations for the diagnostic presurgical workup, and shows detailed technical steps of this procedure. Experimental research-based evidences are also very briefly shown, as an important determinant factor when bone and tooth preparation instruments and their parameters are selected.

Diagnosis and treatment of vascular anomalies

Post traumatic management of condylar fracture complications and how to avoid them

TMJ arthroscopic disc repositioning techniques

Best practice to prevent mistakes in orthognathic surgery

Management of the condylar and subcondylar fractures

Surgical management of the patients with simultaneous TMJ internal derangement and dentofacial deformity

Retroauricular vs. preauricular approach - What are the specific benefits?

## TMJ arthroscopic disc repositioning techniques

**Tomorrow, October 21, 2020, 5:00 p.m. CEST**

### Featured Speaker

Dr. Raúl González-García  
Badajoz, Spain

### Webinar details

- Overview on TMJ disc repositioning
- Most common arthroscopic disc repositioning techniques
- Reported results for disc repositioning techniques

## Curso internacional - Trauma Craneofacial

### Directores del curso

Antonio Marí  
Barcelona, España

Maximiliano Diamante  
Buenos Aires, Argentina

**Miércoles, 18 de Noviembre de 2020 | 14:45 - 19:00 h CET**

**Jueves, 19 de Noviembre de 2020 | 15:00 - 19:00h CET**

### Dirigido a

Está pensado para cirujanos maxilofaciales, tanto residentes como especialistas, que deseen seguir perfeccionando sus conocimientos y habilidades quirúrgicas.

### Objetivo del curso

El objetivo del curso es enseñar y repasar conocimientos avanzados en Traumalogía Craneofacial incluyendo las fracturas mandibulares, las de tercio medio, las de tercio superior y las panfaciales.

### Créditos

Solicitados avales científicos a la SECOM CyC y al BLACIBU.

### Idioma

Español
